- Perfect for daily use or trips away.

*Please note: The Sport SKF/SKR are only available in a long wheel base.*

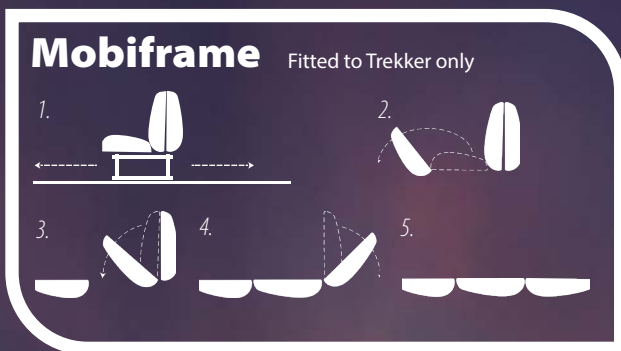

# bed types

Most of our Redline Campervans are fitted with the Rib seating/bed system. Why Rib? See our simple bed guide below.

- Chassis mounted fixing bracket
- IsoFix child seat fitting
- TUV & European Approval
- Sit on the front, sleep on the back
- Injection moulded foam filling
- Multiple back rest positions
- Increased rear storage
- More floor space

- Sliding rail bed and seating system
- Space where you want it
- All sit closer together
- Create space in the rear for multiple purposes (business, hobbies, deliveries, holidays)

RIB beds are perfect for comfort and space saving. With its injection moulded foam and rotating elements, the RIB bed makes a flat, comfortable bed that reduces wear by using both sides of the seat. This method of assembly provides comfort without compromising underbed storage and access to storage lockers.

*Fancy an upgrade? Why not get your RIB bed leather upholstered.*

## optional items
